SUMMARY

Seasoned IT professional with 7 years of experience specializing in database administration and management. Expertise in handling large Oracle databases with a strong focus on backup, recovery, security partitioning, and disk management. Skilled in application tuning, query optimization, and index creation. Proficient in NoSQL databases such as MongoDB and Cassandra, with a proven track record in major financial institutions.

WORK EXPERIENCE

Citibank - Senior Database Administrator
2018-2023
Managed large-scale Oracle databases ensuring high availability and performance. Implemented advanced backup and recovery solutions, minimizing data loss risk. Optimized application performance through query tuning and index management.

Goldman Sachs - Database Administrator
2015-2018
Led the upgrade of database systems to improve security and efficiency. Developed strategies for database partitioning and disk management. Collaborated with development teams to enhance application performance.

Barclays - Associate Database Administrator
2013-2015
Assisted in the management of Oracle and NoSQL databases, including MongoDB and Cassandra. Supported the implementation of security protocols and data protection measures. Provided technical support and troubleshooting for database issues.
