SUMMARY

DevOps Engineer with 12 years of experience in IT, specializing in system administration, Unix/Linux environments, and cloud technologies. Proficient in Kubernetes and infrastructure as code, with extensive knowledge of AWS, Azure, and GCP. Experienced in working with international teams and companies, delivering robust and scalable solutions.

WORK EXPERIENCE

Tech Global Solutions - DevOps Engineer
2017-Present
Led the implementation of Kubernetes for container orchestration, improving deployment efficiency by 30%. Managed cloud infrastructure on AWS, Azure, and GCP, ensuring high availability and performance. Automated infrastructure provisioning using Terraform, reducing manual efforts by 40%.

InnovaTech - System Administrator
2012-2017
Maintained Unix/Linux servers, ensuring 99.9% uptime. Developed and implemented backup and disaster recovery plans. Collaborated with development teams to optimize system performance.

Global IT Services - Junior System Administrator
2009-2012
Assisted in the migration of legacy systems to cloud-based solutions. Provided support and troubleshooting for Unix/Linux systems. Contributed to the development of internal tools for system monitoring.

SKILLS

Unix/Linux, Kubernetes, AWS, Azure, GCP, Terraform, Docker, Ansible

EDUCATION

NATIONAL CENTRE FOR SOFTWARE TECHNOLOGY (NCST/CDAC) MUMBAI
Post graduate diploma for software technology
2001

K.J.SOMAIYA COLLEGE OF ENGINEERING
Bachelor of engineering
1994 - 1998
