SUMMARY

A seasoned Software Architect with 19 years of extensive experience in the software industry. Expert in driving modernization projects, transitioning legacy applications to cloud-native scalable solutions using modern technologies. Possesses deep knowledge in software design and integration patterns crucial for application development. Well-versed in various aspects of architecture including security, scalability, data protection, customization, and localization. Proven track record in leading teams and delivering high-quality software solutions.

WORK EXPERIENCE

Backbase - Software Architect
2019-Present
Led the modernization of legacy applications to cloud-native platforms. Implemented scalable architectural solutions enhancing system performance by 30%. Championing security and data protection measures across all projects.

Intellect Design Arena - Principal Software Engineer
2014-2019
Developed and integrated software solutions tailored to client needs. Contributed to the design and implementation of core architectural components.

Temenos - Software Developer
2004-2014
Started as a software developer and progressed to lead developer roles. Involved in full-stack development and maintenance of financial software products.

SKILLS

Cloud Computing, Software Design Patterns, Integration Patterns, Security Architecture, Scalability Solutions, Java, Python, Microservices, Kubernetes, Docker

EDUCATION

Bangalore Institute of Technology
Bachelor of Engineering in Computer Science
2000-2004
